

Hi, I am Tom Heffron and I invite you to explore the information on my site about the scope of my practice, outcomes, research, and the pioneering work I have done for my patients over the last twenty-five years. My goal is to provide patients with the most surgical options with liver disease through my experience and expertise in liver transplant including living donors and complex hepatobiliary surgery on adults and children. I also use minimally invasive laparoscopic surgery techniques in non-liver transplant recipient cases. In my career to date I have performed over 1,000 liver transplants as primary surgeon. Globally only nine active liver surgeons have that much experience, only five of which are in the US including me. Let me through my experience give you hope.

If you have a question or would like to make an appointment to be evaluated please email me at tom@drtomheffron.com . You may also call me directly at 303-601-5002.

My office is located at The Porter Center for Liver Care at [2535 South Downing, Suite 150, Denver, Colorado 80210.](#)
